

Helmet Sizing Chart

Important Note: The following sizing information was supplied to American Power Sports by each helmet manufacturer as a general guide to assist you in obtaining the proper size. American Power Sports is **NOT** responsible for shipping charges on exchanges. A correctly fitted helmet should feel like an even amount of pressure is being exerted around your head and cheeks. But, helmets break in, so it should fit as tight as you can comfortably wear it. Once fastened, you should **NOT** be able to pull it off your head in any direction. **If your helmet is loose at all, and does not fit well it CANNOT deliver the best protection. A helmet's strict safety standards can be compromised after only one impact collision. If a helmet's integrity is in question it should be returned to the helmet manufacturer for proper inspection.**

For Vega Helmets

To obtain your correct helmet size, put the measuring tape across the forehead, around sides and back of head. Convert inches to correct size using chart below.
